

# INTELLIGENT DOCUMENT PROCESSING (IDP)

Turn documents into clean, validated data. Fast.

## OVERVIEW

EDC's AI-powered IDP solution automates the extraction, validation, and integration of data from physical and digital documents. It captures information from structured, semi-structured, and unstructured formats with near-perfect accuracy, enabling faster, more reliable workflows across industries.

## KEY FEATURES

- AI-powered data extraction
- OCR, NLP, and NLU
- Intelligent validation
- Auto-classification
- Easy integration

## BUSINESS BENEFITS

- Cut turnaround times from days to minutes
- Reduce manual errors with AI validation
- Ensure compliance with secure, traceable processes
- Free up staff for higher-value tasks
- Improve decision-making with structured, accessible data

## USE CASES

- Process **application forms** and onboarding docs
- Extract data from **invoices and purchase orders**
- Capture key fields from **contracts and agreements**
- **Validate identity** from certificates and Emirates IDs
- Classify **delivery notes** and **receipts** for archiving

## TRUST THROUGH NUMBERS

**99.5%**

data accuracy

**30–40%**

reduction in manual processing hours

Supports

**100+ languages**

Used by top organizations across the GCC

## WHAT OUR CLIENTS SAY

“ Our collaboration with EDC has helped advance our digital initiatives and improve the quality of our service delivery. ”

— Ministry of Human Resources & Emiratization (MOHRE)
